Ravi Teja Ragam

AI & Power Platform Developer

Phone: (+91) 9618875954
Email: ravitejaragam503@gmail.com
Address: 4-72, Guntupalli, Prakasam, A.P
LinkedIn: LinkedIn Profile

SKILLS

- AI Integrations, API Integrations
- Power Apps (Canvas & Model-Driven)
- Power Automate (Cloud & Desktop)
- Power BI, DAX, Power Query,
- Data Modeling, Fabrics
- Microsoft Copilot Studio (PVA)
- Custom Connectors, Power Pages
- SQL Server, Azure, Jira
- HTML & CSS
- Microsoft Graph API
- Power Platform COE
- Adaptive Cards, UI/UX

EDUCATION

Bachelor of Technology (B. Tech), *2022*
Jawaharlal Nehru Technological University Kakinada (JNTU-K), Andhra Pradesh, India

CERTIFICATIONS/LICENSES

- Power Platform App Maker Associate (PL-100) - Microsoft
- Power Platform Developer Associate (PL-400) – Microsoft
- Power Automate RPA Developer Associate (PL-500) - Microsoft
- Power BI Data Analyst Associate (PL-300) - Microsoft
- Enterprise Agent Challenge – Participant – Microsoft

KEY ACHIEVEMENTS/AWARDS

Recognized as one of the Rising Stars at Capgemini India Pvt Ltd for exceptional Performance and contribution.

Transforming Businesses with Power Platform & AI-Driven Automation

Certified Power Platform Developer & AI Automation Specialist with 3+ years of experience and hands-on exposure as a Solution Architect, transforming ideas into intelligent, real-world solutions. I specialize in building user-friendly apps, automating processes and integrating systems through Power Apps, Power Automate, Power BI and Microsoft Copilot Studio. With mindset for simplicity and scalability, I blend low-code innovation, data and AI to craft solutions that work beautifully and deliver real impact.

WORK EXPERIENCE

AI & Power Platform Solutions Lead | EY GDS India LLP, Hyderabad, India
Sep 2025 – Jan 2026

- Built AI-powered automation using Copilot Studio, Azure OpenAI, AI Foundry and Python, reducing manual decision-processing time by 80%.
- Improved solution delivery consistency by 60% through Power Platform governance, Dataverse security roles and ALM pipelines.
- Collaborated with global teams to design scalable AI-driven automation solutions ensuring security and seamless integration across enterprise systems.

Senior Power Platform Developer | Capgemini Technologies India Pvt Ltd, Pune, India
Dec 2022 – Sep 2025

- Led architecture and delivery of end-to-end solutions using Microsoft Power Platform components including Power Apps, Power Automate (Cloud & Desktop), Power BI, Power Pages, Dataverse and Microsoft Copilot Studio.
- Designed scalable low-code applications and workflows, enabling automation of complex enterprise processes across departments such as finance, HR and IT.
- Configured environment strategies and security models using Azure Key Vault, environment variables, custom connectors, role-based access controls, and Dataverse security roles.
- Built AI-driven conversational bots using Microsoft Copilot Studio, Azure OpenAI, ChatGPT and Gemini AI, integrating with Teams, SharePoint and Dataverse for intelligent support automation.
- Mentored junior developers and led solution design workshops, reviewing architecture diagrams, user stories and DevOps boards.
- Designed and implemented enterprise-grade integration architecture using Azure API Management (APIM), enabling secure, scalable API access for systems like Workday, ServiceNow, Jira and Microsoft Graph API.
- Managed solution deployment and lifecycle using Power Platform Pipelines and Azure DevOps, supporting environment-based application lifecycle management (ALM) across deployment, testing and production stages.

PROJECTS

Rework Automation
Tech Stack: *Power Automate, Power Apps, Dataverse, File System, AX 2012*

- Automated the rework process by ingesting AX 2012 CSV exports via Power Automate, transforming and storing structured data in Dataverse, and visualizing it through Power Apps with advanced features like filtering, status updates and exports to pdf and excel for the selected records.

AI-Powered Chatbot Integration on Custom Website
Tech Stack: *Copilot Studio, Power Automate, ServiceNow, Azure, Power BI*

- Deployed an AI-Powered Chatbot on a custom website using Microsoft copilot studio, integrated with Power Automate and ServiceNow to handle support queries, automate ticket creation and provide real-time responses.
